- **Frontend:** React.js, React Router DOM, Tailwind CSS, Bootstrap
- **Backend:** Node.js, Express.js
- **Database:** MongoDB
- **Tools:** Git, GitHub, Responsive Design, Cross-Browser Compatibility, Debugging & Troubleshooting

---

Projects

Pro-Academy Course Center

- **Technologies:** React.js, Node.js, MongoDB
- Developed an online course platform with interactive learning features.
- Implemented user authentication and secure course access.
- Designed a responsive and modern UI for seamless navigation.
- **Live Demo:** [Academy Course](#) | **Source Code:** [GitHub](#)

Room Booking App

- **Technologies:** React.js, Node.js, MongoDB
- Developed a fully functional room booking system with real-time availability updates.
- Integrated Firebase authentication for secure user login and registration.
- Designed an admin dashboard for managing room listings (add, edit, delete).
- Ensured a responsive and seamless user experience across all devices.
- **Live Demo:** Room Booking | **Source Code:** GitHub

Visa Navigator

- **Technologies:** React.js, Node.js, MongoDB
- Built a platform providing real-time visa information, including requirements, forms, and processing timelines.
- Developed a dynamic frontend with React.js and a robust backend with Node.js/Express.js.
- Designed an intuitive navigation system for users to track visa applications effortlessly.
- **Live Demo:** Visa Navigator | **Source Code:** GitHub

Tea House Website

- **Technologies:** JavaScript, Tailwind CSS
- Created a modern, responsive website optimized for food and beverage businesses.
- Utilized Tailwind CSS for a sleek, fast-loading, and visually appealing layout.
- Focused on user engagement with an attractive and easy-to-navigate interface.
- **Live Demo:** Tea House | **Source Code:** GitHub

Education

Gaibandha Model High School (2021 - 2026)
